ELECTRICAL**

ENVIRONMENTAL POLICY

As an installer of electrical equipment, Central Electrical (NW) Ltd realises that concern for the environment should play an integral and fundamental part of its business.

To address the adverse environmental impacts of our operations, we will employ an environmental management system. Through this, we will identify our significant impacts and set clear objectives, against which we will monitor and manage our environmental performance and legislative compliance.

We will communicate with our clients and employees on aspects of our performance, and will engage any concerns or interests they express in our environmental improvement programme.

The Company actively supports the principles of pollution prevention, in order to reduce the adverse environmental impacts of our operations and products within reasonably practicable levels.

Through a programme of continual environmental improvement, we will demonstrate our commitment to:

- Complying fully with relevant environmental legislation.
- Optimising efficient use of raw materials and non-renewable resources.
- Using local suppliers to reduce pollution from long delivery journeys.
- The ongoing improvement in efficiency of operations.
- Provide alternative disposal of electrical equipment and other materials by way of re-use and recycling.
- Improving energy usage and energy reduction.
- Specifying and using products which minimise their environmental impacts in production, use and disposal
- Employing local staff to reduce pollution from long journeys to and from work.
- Promote a bike to work scheme
- Providing all employees with an understanding of this environmental policy, and their responsibilities in controlling and improving environmental performance.

Signed

Director
